General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. Researchers should provide information about the methods of analysis used in their studies. For example; Quasi Poisson model and Negative binomial should give information about the model. 2. Standard errors of the coefficients given in Table 2 should also be given. It does not appear in the table. 3. It should also be explained which statistical software program is used in statistical analysis.	1. I added the details about the method of analysis. 2. Added to the table 2 3. All statistical analysis performed in this study was performed using the R statistical software.
Minor REVISION comments	The work will be more valuable when the shortcomings are eliminated.	
Optional/General comments	If the above three shortcomings are eliminated, the work becomes more valuable and becomes publish.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
