PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	- The aim of study is relevant - The introduction is well written - The objective is clear - The results have a good description - The discussion could be a bit more interesting	
Minor REVISION comments	- Abstract ok. - Introduction, line 61 the author uses the initials ANC without a previous explication. - Introduction, line 94: it's a questionable sentence, so this affirmation need a reference. - Methods, line 116 and 117: error punctuation (doctor.one); (Workers.one) - Setting: could be include more details about the city (ex: number of population...) - Line 203: this sentence must have reference (<i>Older women have a higher risk of birth complication and thus the need to have their deliveries attended by skilled birth attendants</i>) - Last paragraph, line 226: must be rewritten because the author repeats the same factors many times.	
Optional/General comments	The study is very relevant, well written and bring important contributions to improve the women and neonatal health in the country.
