

SDI Review Form 1.6

Journal Name:	Asian Journal of Research and Review in Physics
Manuscript Number:	Ms_AJR2P_44711
Title of the Manuscript:	Entropic Uncertainty Relations, Entanglement and the Generalized Uncertainty Principle
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	This manuscript is interesting. However, before however deciding about the publication of this manuscript, I would like the authors to address the following points: 1.The authors discussed the GUP corrections to the entropic force. Therefore, I suggest that the author discuss more about the application of GUP since a lot of works show that the GUP can used to modify the thermodynamics of N-dimensional Schwarzschild-Tangherlini black hole, speed of graviton, et al. The references are: arXiv:1607.04114; arXiv:1604.04702; arXiv:1610.08549.	<i>We explicitly enumerated some of the applications of the GUP including the investigations of GUP effects on the speed of gravitons, on the thermodynamics of the Schwarzschild-Tangherlini black hole and the entropic force law in the paragraph after equation 3. We also included additional references as part of reference #10 of the paper.</i>
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
