

### **Editor's Comment:**

I analyzed the results of the review process and based on that I recommend to accept the manuscript Ms\_AJRAF\_40140 "*Determinants of the Quantity of Non- Timber Forest Products Collected from Block A and Golf Course Forests of International Institute of Tropical Agriculture (IITA), Ibadan, Oyo State, Nigeria*" for publication as original research paper in the Asian Journal of Research in Agriculture and Forestry.

Having said that, I find that the title is long, too specific and detailed; details can be provided in abstract, as authors did. In particular, I think that it is not necessary to refer to which forests of the Institute it is matter about, abbreviation should be avoided and reference to state is not necessary. Therefore, I suggest the following alternative title "*Determinants of the Quantity of Non-Timber Forest Products Collected from Forests of the International Institute of Tropical Agriculture in Ibadan, Nigeria*".
