

SDI FINAL EVALUATION FORM 1.1

PART 1:

| | |
|--------------------------|---|
| Journal Name: | Asian Journal of Research in Agriculture and Forestry |
| Manuscript Number: | Ms_AJRAF_42038 |
| Title of the Manuscript: | Assessment of Woody Species Diversity in Different Ecological Zones of Taraba State, Nigeria: A Strategy for Conservation |
| Type of Article: | Original research papers |

PART 2:

| FINAL EVALUATOR S comments on revised paper (if any) | Authors response to final evaluator s comments |
|---|---|
| The feedback received on only diameter measure to determine the Woody Species Diversity in Different Ecological Zones, is not the only way to determine Species diversity. The study needs to take account the growth variables. So, there are missed these important aspects in the methodology section, such as lack of clarity in the growth variables to measure and lack of the species importance values. | Regeneration status of woody species in different ecological zones of Taraba State forests is an independent research paper which emphasis on the growth variables. |
