| FINAL EVALUATOR'S comments on revised paper (if any) | Authors' response to final evaluator's comments |
|---|--|
| <ol style="list-style-type: none"> 1. I suggested some revisions on manuscript. I think the manuscript will be better if the authors correct the article by taking these recommendations into account. 2. The results of Variance Analysis should be given in the text. It is not clear which factors are important (provenance, pre-treatment or provenance x pre-treatment). The Duncan lettering should be made according to the materiality levels. 3. I do not understand the tables. I see only the data. The results can be interpreted better after statistical analysis of the data is made | <p>Respected sir,</p> <p>Thanks for providing valuable comments, I revised the paper according to your given suggestion and rewritten the points as suggested by you. Still if there is lacking any points i will be ready to correct after your valuation.</p> <p>Thanks With Regards</p> |
