<ol style="list-style-type: none"> <li>1. The results of Variance Analysis should be given in the text. It is not clear which factors are important (provenance, pre-treatment or provenance x pre-treatment). The Duncan lettering should be made according to the materiality levels.</li> <li>2. I do not understand the tables. I see only the data. The results can be interpreted better after statistical analysis of the data is made</li> </ol>	<p><b>We have included the level of significance both across the provenance and different pre-sowing treatments in the table.</b></p> <p><b>If all data with replicate will be given in the table , it will little confusion among the readers .so we are representing the data in a simple form.</b></p>
