FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The Author has reviewed and resubmitted the reviewed version. However, I have one suggestion that let the author indicate clearly the sections which have been improved in the new version</p> <p>For example Line 8: In my Comments I stated that Eda Forest "Reserves" check for consistence if it is reserves or reserve as in the title, line 11 etc. The Author should indicate where are the changes have been made (put) in the reviewed manuscript. Let say in Recommendation X in Line 8 been made as in Line Y, XY, and YY etc. of the reviewed version. This is important because after review the line change too.</p>
