

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Research in Agriculture and Forestry
Manuscript Number:	Ms_ AJRAF_43304
Title of the Manuscript:	ANALYSIS OF FARM RISK AND COPING STRATEGIES AMONG MAIZE FARMERS IN LERE LOCAL GOVERNMENT AREA OF KADUNA STATE, NIGERIA
Type of Article:	Original research article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1. Abstract too long 2. Introduction too long and each paragraph too long 3. Description of study area too long 4. Study area map not properly drawn with scale and cardinal points. E.g N-direction 5. Labelling of study area figure and reference made on the study area map 6. Tables not referred to in the text 7. Tables not properly drawn with excel for automatic adjustment 8. Numeric references not properly done	1. The abstract here basically gives a brief summary of the whole research work highlighting the topic, study location, sampling procedure, sample size, method of data collection, analysis as well as the major findings. Anything short of this will not convey the exact content of the whole research work. 2. The introduction may be long but not actually out of place as it tries to give an in-depth background information of the topic under study. This was recommended by the earlier reviewer. 3. The study area map expunged for lack of clarity and representation of the study area. 4. Tables now properly re-drawn in excel as requested. 5. Each Table is now referred to appropriately in the text. Thank you.
