PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The manuscript still needs significant improvement and cannot be accepted in its current format.</p> <ol style="list-style-type: none"> 1. The abstract is not well written; 2. The results were not detail enough and lacks general scientific expression. 3. There were a lot of typo errors. 4. Formatting was not standardized. 5. There was no hypothesis testing, although the authors attempt to report by 6. There were sub-headings with write-ups of only two or three-line sentences. Clearly this is unacceptable. 7. The results were not well presented. There was a general lack of coherence in the results presentation. <p>I urge the editor of this prestigious Journal to accept my unbiased comments in good faith, since this manuscript was rigorously reviewed.</p>
