

SDI Review Form 1.6

| | |
|--------------------------|---|
| Journal Name: | Asian Journal of Research in Agriculture and Forestry |
| Manuscript Number: | Ms_AJRAF_42469 |
| Title of the Manuscript: | Development of triploid varieties of Hevea brasiliensis using endosperm |
| Type of the Article | Original Research Article |

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

| | Reviewer's comment | Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here) |
|-------------------------------------|--|---|
| Compulsory REVISION comments | | |
| Minor REVISION comments | | |
| Optional/General comments | The authors reported their novel study in Callus induction, especially in Triploid nature of endosperm callus (3n =54). These works have merits in "isolation, culture and division of protoplasts from endosperm tissue of Hevea brasiliensis" and "Triploid nature of endosperm callus (3n =54) was obtained". I recommend accept this MS for publication in AJRAF. | |
