Title of the Manuscript:	CONSTRAINTS TO AGRICULTURAL PRODUCTIVITY IN KAINJI LAKE NATIONAL PARK, NIGERIA
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The abstract is still very weak The problem statement is still not sharp and not convincing It is silent on the crop The methodology is not flowing and model not properly specified. I don't think is a suitable model for identifying production constraints. What is a constraint in this work? it is not well defined. Some of the variables have a negative relationship and others have a positive relationship. What is the independent variable?
