<p>There are many spelling mistakes in the abstract. The sampling approach can still be summarized It is too long and should be further summarized Farm size cannot be used as a proxy for farm productivity. So using farm size as the dependent variable is misleading and difficult to appreciate. The writers need to explain more about the model and how the results were obtained. Since the study is looking at productivity? Which crop productivity is it looking at. If they are multiple crops then they have to be weighted and used as a proxy for productivity.</p> <p>I am still not comfortable for the publication of this paper</p> <p>What is duration of cultivated farm land? What is it and how important is it in this study</p> <p>There are so many typographical and spelling mistakes. These need to be delt with</p>
