PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Homestead agroforestry is a much studied subject in the Bangladesh context – a large number of published papers and unpublished theses, reports are available. The manuscript reported 29 different agroforestry systems only, no classification criterion, no critical comparative, economic or ecological issues were raised or discussed or evaluated. No productivity, conservation, food-nutritional or poverty reduction were considered. No connecting the empirical data to theoretical, phytogeographical, sustainability or climate change issues were attempted	This work was done to just to find the common agroforestry systems present in the studied area. We are still working on the other important things like you mentioned. But it will take time.
