

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Biochemistry
Manuscript Number:	Ms_AJRB_43243
Title of the Manuscript:	High-level expression and purification of DNA and DNase free Taq DNA polymerase
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Please try to improve the clarity of Figure 5b, it is a bit fuzzy and numbers on x – axis are hard to read.	The improved version of the figure with more clarity has been included.
Minor REVISION comments	Line 45, please provide a reference for CaCl ₂ method. Line 56, please define IPTG Everywhere make sure kda is kDa Everywhere make sure 'l' for liter is capital 'L'	<ol style="list-style-type: none"> 1. The reference for CaCl₂ method is included. 2. The IPTG is defined now 3. The kda has been changed in line no. 24 to kDa. 4. The 'l' for litre is changed to 'L' is changed in few places. <p>The changes are made and highlighted in the text.</p>
Optional/General comments	The paper is very thorough in its presentation of procedures, and this is appreciated. The outcome of a purer Taq DNA polymerase is a good achievement well worth reporting.	Thank you for the feedback.
