General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Even though references are adequate, it is recommended that the authors better develop the problematic o the study. As well, it is necessary that author develop a strong theoretical foundation of the study in order to connect the ideas of the authors studied in this problematic, which is related to the one size fits all. Methodological procedures must be detailed and results must be provided in accordance to the theoretical and Methodological foundations used in this study. Are there categories developed? How were results interpreted? How were they discussed? It is also recommended that the authors write a conclusion section in order help the readers understand why their research should matter to them after they have finished reading the paper. Thus, a conclusion is a synthesis of key points and, if applicable, where you recommend new areas for future research.	
Optional/General comments
