

SDI Review Form 1.6

Journal Name:	Asian Journal of Research in Computer Science
Manuscript Number:	Ms_AJRCOS_41758
Title of the Manuscript:	Integration of Open Source GIS Software for Improving Decision Making in Small and Medium Companies
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This paper proposes data integration (using GIS) for small/medium companies. The topic looks good, but data representation would have been clearer if presented a bit clearly. The prototype tools are nice to hear about but land us nowhere. The data integration process, its usefulness to the concerned companies, previous methodologies, shortcomings and the advantages of the proposed idea should be more elaborated than it is. The conclusion also can be enhanced a bit more.	
Minor REVISION comments	The references should be more than 15 or so and should be quoted in a more disciplined manner. The papers have to be after 2010 so as to understand the latest trends.	
Optional/General comments	English can be improved. (Presentation)
