PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1. The paper lacks in describing the actual motivation why the author thinks of integrating the various features and functionalities of Open Source GIS software. 2. The methodology, data collection, data processing and data transformation are not explained. 3. The user is suggested to first review the previous literature on the present topic, then find the existing gap and then provide the proposed work in reference to the previous work. 4. All the Figures in the paper are of very poor quality. 5. Typos and grammatical mistakes are found throughout the paper. 6. User is suggested to include detailed case studies. 7. References are not in format.	
Minor REVISION comments		
Optional/General comments		

As per the guideline of editorial office we have followed VANCOUVER reference style for our paper.
