SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	In the abstract as the second sentence you can add one sentence explaining the existing problem without mixing with the suggestion of CBT. Add a sentence in the abstract for future research (asan example, the validly and satisfaction of the new CBT system from staff and students' perspectives) 18-39 you can rearrange the sentences based on What is stand for GST and why it is important and how it has been evaluated up to now. But now, what type of problem has been aroused. Then with the citations mention the CBT as the solution for that (very briefly because you are going to give long description in the literature review). In the 50 -69 very clearly address the CBT overview only. (without explaining advantages again and again) You must mention the research question(s) as the purpose of the research and after getting the findings you have to answer for the research questions in the Discussion section. The significance of the research is missing. CBT system in Nigerian institutions can add to Literature section to the latter part (from 190) and there you can prove the success stories from the literature in the world and the mothercountry to strength your research. In 198 you can name it as Research Methodologyand briefly give idea to reader what you are going to explain...with this section. (eg: Sampling frame; Population, sampling method and derive of the sample, Data collection methods and the instrument and it's validation, analysis of the data and the statistical methods you are going to use for your inference or qualitative method) Clearly mention what type of method you used for data collection and the instrument you use for the interviews. Line no:235- 245 must include in the first section while you are introducing the problem. The research findings you can clearly mention in 4th section of final results. Figure (1): Use Case Diagram is not clear. Pl. insert a clear diagram to enhance the quality of the paper. Your recommendations are missing. As the future research you can discuss the satisfaction of the newly developed system of the students and the staff and also validity and security.	Noted and corrected.
Minor REVISION comments	Proof reading will be enhancing the quality of the paper and the readability	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
