General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The author wrote information about the cosmetic use skin bleaching cream among the female audience. It presents a sociodemographic profile and the use of the skin bleaching cream. The interesting thing is that most use without a prescription and with the intention of getting more beautiful.	Yes it is interesting , but maybe because it's the esiest way to get the medication from pharmacy not waiting a doctor prescription , espacily with wide spread of these medication or agents on intrnet
Minor REVISION comments	There are some typing problems Figure 1 must have y-axis, in addition to take out the word value and replace with the number; as the data of this figure are in table 2 I suggest to remove this data from the table and leave only the graph Format table 3 In line 163, is the P value = zero? I suggest you have a conclusion from the authors at the end of the discussion.	I change the figure ti y axis and removed the date from the table I change by checking it back to 0.001 I insert the conclusion
Optional/General comments
