	Reviewer's comment	Author's comment (if agreed, highlight that part in the manuscript. It is your feedback here)
	1. The first part of the concluding remarks should either be rephrased or removed. It does not sound like a conclusion to the findings of the research. 2. Some additional concluding remarks could be added to explain the theoretical analysis part of the work. 3. Table 1 is inserted in between references. This is not allowed. It should be removed and placed in the main text.	1. Rephrased. 2. Done. 3. Done.
	1. The title of the paper is in line with the journal's aims and objectives. 2. Author(s) have a very good understanding of discrete models. 3. The optimal control analysis has been properly done. 4. The entire arrangement of the work and its referencing was properly done. 5. REVIEWERS DECISION: I would therefore recommend the publication of this manuscript in the journal if the author(s) incorporates these suggestions. 6.	Thank you very much for your feedback. Best Regards.
