SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<u>Compulsory</u> REVISION comments	The material is presented appropriately and clearly, the data contained in tables represent understandable documentation of the research problem. The findings shown in the manuscript are valuable and very important. I recommend the publication in its present form, optionally I propose to locate the study area (and sampling points A-J) on the map of Nigeria and neighboring countries (for better location for foreign readers) (in section "Study area description").	Thanks for this suggestion, however we tried getting the actual location of the sampling sites from the study area description but little literature even exist about the coordinates of the Owo Local Government Area and no literature review on any actual location in the study area. Thanks
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
