SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>Title: Too long need to revised</p> <p>Materials and methods -the author/s have left the reader with a lot of question i. why chose the Ogun and Etick states- what was special in the chosen study areas ii. why use multistage and semi-structured - need an explanation</p> <p>Results -table of results need to revised - line 137-140 are part of the results - associated factors with inconstant use of the sexual active young person did not come out vivid</p> <p>Discussion To be re-written. There is no flow of ideas in the discussion</p>	
<u>Minor</u> REVISION comments	<p>Introduction There is problem of English Eg Line 17- will should was Line 23. We do not start a sentence with number Line 37 the argument should be backed with reference so is line 38 and 41 line 44 and 45 are not well linked</p>	
<u>Optional/General</u> comments	<p>Researcher/s are addressing an important aspect of protection against HIV and STI. However it is not well written. There is some problems in English language.</p>
