| <ol style="list-style-type: none">1. There are several typographical errors (see the yellow highlights....no spacings)2. Spelling errors (see the blue highlights)3. More than one reference required (see purple highlights)<ul style="list-style-type: none">• 4. Some of corrections highlighted in the original work were not effected....(3. Review of any topic requires consultation of various research works. The citations for each of the ulams in this article are not enough to validate their effectiveness as antimicrobial as your title suggest. The article was reporting only one research work in each of the ulams reviewed; 5. When several studies/researchers are referred to in a statement, more than one citation is required. See page 2, line 24-26; page 3, line 49-51; page 4, line 76-78; A subtitle is required after Introduction section, before discussing the various Ulams (page 2) | |
