<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1. The abstract should be logically flow since the topic is healthcare workers and not focusing on Nursing staff alone.</li> <li>2. There some typographical errors that was highlighted in this study. Pvalue and should be P-value</li> <li>3. Table 4 can be deleted, since you are focusing on the risk factors and prevalence, you can include it in another write up with different topic.</li> <li>4. In discussion, more detailed and recent reference to the literature is needed.</li> <li>5. Some of the references seem missing in the list, and some were not properly cited like number 11,</li> <li>6. Avoid using statistical test you have not undertaken during this study like (The majority of demo-graphic factors of this current study subjects including occupation, gender, marital status and etc do not showed any significant association with LBP severity, except the age factor, that presented <b>clear positive correlation</b> with LBP severity as most old workers were suffered LBP severity).</li> <li>7. Try to defend why you used the small sample size in terms of sample size errors.</li> </ol>	
<b>Minor</b> REVISION comments
