PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>1. How about "Retrospective analysis of HBV and HCV Serological Screening of Suspected Liver Diseases Patients Seen at A Tertiary Hospital in Bauchi, Nigeria" for your title.</p> <p>The two titles are opposite to each other and mean different things. Your title suggests your study is prospective and it is not. Your title is misleading and contradicts your purpose for this study.</p> <p>2. Human research ethical committee (HREC) permission must be obtained in writing and this should be stated in your methodology. Without that permission you cannot have a human subject study whether it be retrospective or prospective.</p> <p>For some it is required that a scanned copy of HREC permission be presented to editor along with your manuscript.</p>
