**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1. There is more information on infected meshes and microbiological analyzes under the heading of microbiological studies. None of this information was used in describing surgical technique or in discussion. I think they are irrelevant.</li> <li>2. I think "table 1" is unnecessary and wrong. There are only 12 patients and you are giving detailed information about the side of hernia and statistically meaning of this.</li> </ol>	<ol style="list-style-type: none"> <li>1- Our study include cases with intractable infections, we exclude cases with successful infection treatment, so microbiological study was necessary.</li> <li>2- Patients characteristics were presented in the table, all were non significant, with male predominance.</li> </ol>
<b>Minor</b> REVISION comments	<ol style="list-style-type: none"> <li>4. There are some vocabulary and grammar mistakes." Carful" instead of careful etc. Therefore the entire text should be reviewed.</li> </ol>	Text is reviewed
<b>Optional/General</b> comments	<ol style="list-style-type: none"> <li>1. I suggest that the text should be prepared in the form of "letter to editor"</li> </ol>	noted
