**PART 1: Review Comments**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The authors report a case with intraosseous ganglion cyst of the scaphoid treated by curettage and vascularized radial bone graft. Many readers would think that just curettage and bone grafting is enough for the treatment. Supportive logic or reverences would be necessary in the usage of vascularized radial bone graft.	Thank you for your valuable comments. The corrections have been made and highlighted.
