

Editor's Comment:

I thank you sincerely for your kind request concerning my editorial decision for **Manuscript number Ms_AJSSPN_36165**,

Title: Constrains, production systems and roles of phosphorus in rice production in Tanzania.

In general, I support the publication of revised version of Manuscript in the [Asian Journal of Soil Science and Plant Nutrition.](#)

But I consider authors should add in the Review the literature data confirming key role of plant hormones and plant growth regulators in enhance P use efficiency by rice plants and in enhance efficiency of rice seed production.

I hope for authors consent on my request.
