

**Editor's Comment:**

I thank you sincerely for your kind request concerning my editorial decision for Manuscript number Ms\_AJSSPN\_36868, Title: BIOREMEDIATION OF HEAVY METALS IN THE SOIL BY *PSEUDOMONAS AERUGINOSA* AND *TRICHODERMA HARZIANUM* USING *SOLANUM LYCOPERSICUM* AS TEST PLANT

I have verified the revised version Manuscript with authors' corrections added according to reviewers' comments.

On the whole I support the publication of revised Manuscript in the Asian Journal of Soil Science and Plant Nutrition

But I consider that authors should add in the text of Manuscript 1) the morphological parameters and yield indices of *S. lycopersicum* plants grown under treatment by

*P. aeruginosa* and *T. harzianum* in the soil polluted by heavy metals; 2) References on methods used for statistical analysis of data obtained.

I hope for authors consent on my comments.
