

Editor's Comments:

I have checked the whole manuscript and give some suggestions as you may find in the attachment of this mail. Regarding this manuscript, would you mind to notes:

As state in the title, the study was about unfavorable ecosystem. But there is no any discussion on how ecosystem influences rice growth and production within the study sites.

Author's feedback:

Thanks for your valuable suggestion. I have revised the discussion section as per your opinion. However, lines no 230-234 and 248-264 has discussed about reduce or increase grain yield under different ecosystem in angladesh.
