

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Journal of Soil Science and Plant Nutrition
Manuscript Number:	Ms_AJSSPN_38378
Title of the Manuscript:	Different nitrogen fertilization in Jabuticaba seedlings
New Title of the Manuscript:	Different nitrogen fertilization in <i>Plinia cauliflora</i> seedlings
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>Title of the article is not good. I found many mistakes in English language in the article. Need thorough revision. Introduction section still does not provide the need and significance of this work. Only few parameters (plant height, diameter, N contents and crude protein) were estimated, which are not enough especially on the topic which has extensively been studied worldwide.</p>	<p>We tried to find a better title for the article. We reviewed the mistakes and found some things that really had to be fixed. About the need of this work, we believe the introduction is better structured now and, at lines 67-73, we try to explain how little is the information about the effects of fertilization on the plant. These were the only parameters that were evaluated, we do not have any extra data.</p> <p>We thank you for all the observations.</p>
