PART 1: Review Comments

	Reviewer's comment	Author's comment *(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)*
Compulsory REVISION comments	At very first appearance in the text, common plant name must be followed with latin name (formatted in *italic*) in brackets (e.g.: "… jabuticaba (*Plinia cauliflora*) …"). After that 1st appearance, you shall write common plant name (without latin name). English sentence can't start with verb such as "was", "were", so change it in the Abstract, line 48, 52, 57, 60 and 61. In Figures' legend I observed different line shapes from real lines in figures; it is problem of supporting different symbols in different text processors. So, go ahead and resolve this problem. In References, authors' names are missing in line 148, and words' order has to be changed in line 162 (cite record MUST start with the word used in previous text, which is EMBRAPA) In line 177, there is some weird text; please, check it.	
Minor REVISION comments	Typing/format errors in lines: 50, 51, 53, 54, 62, 76, 80, 103, 108, 113, 116, 117, 120 (text beneath x-axle), 135	
Optional/General comments
