PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Does the title adequately reflect the content? Is the abstract accurate and informative? Is the research problem and rationale adequately explained? Were the methods appropriately chosen and applied, and adequately described? (including statistical methods) Are the conclusions and interpretations adequately supported by the data? Are the references used appropriate, correctly cited and listed? Does the work presented comply with journal aims and scope? Is the quality and style of writing adequate and appropriate? Does the work make a contribution to its chosen topic/field? I thank that the manuscript 'lack of Novelty', must be it is scientifically robust and technically sound. The research could contribute to improve the sustainability of infiltration models; an innovation management plan has not been developed in the research Results& Discussion Results and discussion needs a clearer explanation by citing the research that meets this.	
Minor REVISION comments	The research management and communication module does not describe specific activities.	
Optional/General comments	Concerns over possible plagiarism or self-plagiarism, based on checking using iThenticate
