PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The content of this paper is only an enumeration of the results of investigation as usual, there is no deep discussion on it. The meaning of the order of the items in the table is unknown and difficult to read. Figures 1 and 4 are not ordinary pie charts, Since Wikipedia cannot trust the information source, it is not used for reference.	Thank you for your comments. Best of our knowledge, corrections were made. Wikipedia reference removed. Table titles were changed. This paper was a preliminary study result only. Authors are doing further research according to your comments. Detail study will be published in future.
