PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	As a research topic it is very interesting and I think this topic is a need for people in tropical region. However, how to arrange the items of the traditional medicine in the table, how to use the graph in the figure, how to compare and study the medicine of each traditional medicine etc, there are too many immature contents as the level of academic papers in this paper. It is necessary to reconsider the composition and content of this paper by referring to other academic review papers adequately. Again, this research theme is very, very important for public hygiene, so we look forward to the further efforts of the authors.	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments
