

Editor's Comments:

Author is suggested to perform minor corrections:

Keywords: about 4-8 keywords should be given – the author only present 3

Feedback: Additional keywords have been added

Reference style:

- References must be listed at the end of the manuscript and numbered in the order that they appear in the text – that's not the case so the author is suggested to correct this – proof throughout and final list.
- Do not start questions with references number (e.g.: lines 52, 129, 138 314– maybe the editor

Feedback: References have been rearranged and adjusted.

Tables:

- the author is suggested to take a closer attention to tables format – table n°1 is very hard to understand: is there any X or Y axe or..?
- there are no reference to table 3 in in the text – may the author compile table 2 and 3 in a single one?

Feedback: The tables have been merged.

Minor editing errors:

- line 153: replace “he under-...” by “**be** under-..”
- headings of the text should be reorganized: e.g.:

1) Probability Sampling Methods

- a) simple random sampling – and then explained what it is...
- b) stratified sampling -
- c) systematic sampling
- d) cluster sampling

2) Non-Probability Sampling Methods

- a) judgmental sampling – and then explained what it is...
- b) quota sampling -

c) convenience sampling

d) snowball sampling

Feedback: Minor editing errors have been corrected

Author's Feedback:

The corrections have been effected.
