SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments		
<u>Minor</u> REVISION comments	Lines 48-50 sound more like methodology Line 59- should read is a very broad concept Ln.66- revise and use "accept" social responsibility than are more social..... Ln.81-most of the.... Ln 82-89 needs citation of source of that information Ln 89...adapted to a broader Ln 95-98 sounds more like methodology Ln 105 instead of saying "it was painted" Write the authors who said that. Ln123- use past tense under Methodology Ln 178- use past tense	Ln-48-58 moved to Ln-114-124, under Methodology Ln.59 turned to line 48— The concept of social entrepreneurship, just like the concept of entrepreneurship, is a very broad concept and is difficult to define. Ln.81 turned to line 70 Most of the relevant literature stresses that social and traditional entrepreneurs are similar, that they have shared personal traits and capabilities in general, but that they are motivated by different outcomes Ln.82-89 turned to line 73-79 authors are written at the head of the passage and citation of source at the end of the passage. According to Barendsen and Gardner [10], social entrepreneurs are energetic, obstinate and generally self-confident people. They have the ability to encourage/persuade others to participate in their activities. They take on responsibility. Social entrepreneurs are usually pragmatic and they can describe their action

		plan in great details. They can hire others to make their plans if they do not like making practical plans. They are independent. This, however, does not mean that they are alone or that they work independently of market forces. Indeed, they work with the mentality that targets should be adapted to a broader framework [10]. Ln.89. Indeed, they work with the mentality that targets should be adapted to a broader framework. Ln.123- This study aimed to analyse university students' social entrepreneurship profiles and to evaluate their levels of social entrepreneurship comparatively Ln.178- According to Table 2, 74.0% of the participants were female while 26.0% were male.
<u>Optional/General</u> comments	This is an interesting manuscript that is original.
