SDI Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>General comments</p> <p>The manuscript's theme is interesting. However, I have some concerns about the manuscript:</p> <p>1) The structure of the manuscript must be improved in accordance with the conventional structure of a scientific article (introduction, material and methods, results / discussion, conclusions and references). The structure is fragmented, clashing of international standard.</p> <p>2) The objectives of the manuscript are simpletons and the research problem seems very predictable. This makes little exciting manuscript. It is not clear the novelty of the findings. Authors should clarify the reasons for the study. What were the initial hypothesis? What are the implications of the findings?</p> <p>3) The results are presented, but there is no discussion of the data. The authors do not explain the findings, either connect the characteristics of the respondents. There is a very simplistic description of the findings.</p> <p>4) It is necessary to draw up a thorough discussion of the results. Otherwise, the manuscript appears very simple and does not contribute to the advancement of knowledge of the area.</p> <p>I do not recommend 3D figures in graphics. The titles of the figures should be improved. All figures should be self-explanatory. The X and Y axes of the graphics should be named. There are too many numbers in Figure 2 which supercharges the figure.</p> <p>5) The conclusions should be rewritten. There is</p>	<p>The suggestions are well noted. The necessary corrections and updates have been effected.</p> <p>The data on annual yields are certified data from statistical and research department of the Ministry of Food and Agriculture. The issues addressed in this paper are what pertaining in the study area. The paper has gone through the ethical processes of the Ministry. The authors also employed the ethics of conducting academic research. Author 2 is a member of academic and research committee of Presbyterian University College, Ghana, this paper has passed through this body. It is based on this that the paper has been submitted to the above named journal for peer review and publication.</p>

	<p>difference between conclusions and summary of the results. The authors present a summary of the results and not conclusions. Conclusions are more general and require further reflection on the results.</p> <p>Thus, considering these aspects, the paper should prioritize the publication of more original studies and better structured.</p> <p>Authors should clarify whether the study was approved by an ethics committee</p>
