SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Research Journal of Agriculture
Manuscript Number:	**Ms_ARJA_33431**
Title of the Manuscript:	**Effect of Feeding Raw kapok (Ceiba pentandra) seed meal on the Growth Performance, Nutrient digestibility, carcass and organ weights of Weaner Rabbits**
Type of Article:	**Original Research Article**

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	**Authors' response to final evaluator's comments**
Table 2. Contrary to what the author wrote in response, no units were inserted. The author needs to use the correct units. For some anti-nutrients, such as phenol, alkaloid, and flavonoid, there may be a decimal point error. That would show them as 10 times more than they actually are. For trypsin inhibitor, the second paragraph of Results lists the units as mg/kg, which seems correct but is different from % indicated in the table. For haemagglutinin in Results the unit is units/kg. The author needs to correct these units.	**-The results are in percentages. Suggestion noted and corrected**
Table 3. The author indicated the change of average weight gain to average daily weight gain was made. It was not. It needs to be changed. The FCR is shown as 1.9 for the Control group. Other information that I found through library research never had a FCR less than 2.9. If research lists performance data that are much different from what is reported by others, it indicates that there are serious problems with that research. The same applies to dressing percentage. See Proceedings of the 8th World Rabbit Congress, Sept. 7-10, 2004, page 1360.	**- Noted and corrected check Table 3** **- Observation noted and corrected. See Table 3**
