

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Research Journal of Agriculture
Manuscript Number:	2018/ARJA/39479
Title of the Manuscript:	Yield performance of tomato hybrids during summer season in Sylhet
Type of Article:	Original Research article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>I understand the motivation reported by the Author. However, the main issue remain that the work was carried out in just one year, so the environmental variability due to the different years is missing. At least a second year of experiment should be reported.</p> <p>Line 22 e.i. change with i.e. Line 23 occurred Line 26 season, you should remove the full stop Line 41 Ahmad <i>et al.</i>, 2008; Line 58 4 rows Line 61 @ what does mean? Line 63 Triple Super Phosphate you can delete it, the extend name was already reported before Line 64 the same for Murate of Potash, you reported already the extended name, delete it Line 72 mulching, which type? Lines 111-113. which results were reported by Ahmad et al., 2011? Describe briefly, please</p>	<p>The best performers among the six hybrids remain under trial in different locations in Sylhet region to observe the performance during summer.</p> <p>Revised paper has been corrected as reviewer comments.</p>
