

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	Asian Research Journal of Agriculture
Manuscript Number:	Ms_ARJA_34874
Title of the Manuscript:	REASONS PROMPTING THE ADOPTION OF ORGANIC FERTILIZERS IN VEGETABLE PRODUCTION IN AGOTIME-ZIOPE DISTRICT, GHANA
Type of Article:	Case Study

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>The paper still has grammatical errors and improper punctuation. Complete editing is critical as the Journal can end up publishing an article with numerous mistakes.</p> <p>The sample size has been explained but no motivation has been given for the number 50. This is critical as there is always a minimum sample size required for one to carry out certain analysis. I expected a formula indicating the required sample size but none has been given. This is the weakest part of the paper and I am not sure it can be remedied at this stage. Unless there is clear evidence that the sample used is amiable to the analysis carried out, I would reject the paper.</p>
