

SDI Review Form 1.6

Journal Name:	Asian Research Journal of Agriculture
Manuscript Number:	Ms_ARJA_37992
Title of the Manuscript:	Detection of Dichlorvos Residue in Cowpea Grains, Six Months after Application Using High Performance Liquid Chromatography
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The subject is important to agricultural practices in Africa, but I would like to know the MRL value of dichlorvos in cowpea, African value or Codex etc. The detection and quantification limits of LC technique should be demonstrated to work well to MRL limit. The fortification study should be described to guarantee the chromatographic analysis. It was not clear the method for extraction and purification of the sample for dichlorvos analysis in cowpea. Which days after application of pesticide were evaluated? Only after 6 months and the "zero"? Why the samples were 4 kg and 1 kg, explain it?	
Minor REVISION comments		
Optional/General comments
