

Editor's Comment:

We carefully analyzed the evaluation process and the final paper. Unfortunately, this paper can not be accepted for publication. The recommendations of the reviewers contributed to the improvement of the paper. However, these improvements are needed:

1. Improving the results obtained by developing a comparison of the results with the literature.
2. Improve the conclusions and make them more detailed.
3. References to at least 5-6 papers from the international literature.

After these completions the paper can be considered for publication.
