

**SDI Review Form 1.6**

Journal Name:	<a href="#">Asian Research Journal of Mathematics</a>
Manuscript Number:	Ms_ARJOM_43569
Title of the Manuscript:	Sg-continuity in Topological ordered spaces
Type of the Article	

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://www.sciencedomain.org/page.php?id=sdi-general-editorial-policy#Peer-Review-Guideline>)

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	In this short communication, the authors define the notions of semi generalized increasing (resp., decreasing, balanced) continuity of functions between topological ordered spaces, which is a topological space with a partial ordering. They show the independency of the proposed notions by giving examples. Despite it is a simple paper, I think that it will be useful for further researches. So, it may be accepted for publication.	
<b>Minor</b> REVISION comments	I only advise the authors to add the definition of semi openness, so hence readers do not need to look for any other papers to see this definition.	Semi openness definition included in the paper in the preliminaries
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
