PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
The authors have not addressed any of the issues I raised, namely: 1. Recast the whole of your abstract to make sense, e.g. the sentence in line 4 does not make sense just like others in the Abstract. 2. Proofread the paper thoroughly to correct many grammatical errors and typos e.g. line 18, "basic on these theories and results, The properties" should be properly punctuated. 3. Phrases as "even if your calculus is rusty" of line 25 are unethical and should be avoided. 4. The convergence theorems in lines 27-33 should be properly stated and cited.
