Manuscript Number:	Ms_ARRB_40352
Title of the Manuscript:	Effect of Nitrogen Rates on Growth, Carbon Assimilation and Quality of Water Spinach (Ipomea aquatica)
New title:	Effect of Nitrogen Rates on Growth and Quality of Water Spinach (Ipomea aquatica)
Type of Article:	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
1) No tables at all in the manuscript, authors can present some figures e.g plant height, number of leaves and number of branches in tables 2) Most of my corrections were not effected. See text 3) For validation purpose, two years experiment would have been better	<p>Thank you for your suggestions however, since the data was massive (weeks 1,2,3 and 4) we think the representation in figure was preferable because we can easily observed the line pattern compared to numbers.</p> <p>We have relook some of your comments and made the corrections</p> <p>Thank you for your valuable comments; this will be take into consideration on our next experiments.</p>
