

SDI FINAL EVALUATION FORM 1.1

PART 1:

Journal Name:	British Journal of Applied Science & Technology
Manuscript Number:	2014_BJAST_15372
Title of the Manuscript:	STUDY OF THE BEHAVIOR OF DAIRY PROTEIN IN DIFFERENT CONDITIONS OF THERMAL PROCESSING USING CHEMOMETRIC APPROACH
Type of the Article	Original Research Article

PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
I think that the paper remains too long and it would be reduced to main results related to viscosity measurement. Too much data were shown that disorient the reader, in my opinion the paper should be reorganized in a simple form. The authors did not modify the paper in this sense.	We do not agree with this specific referee's opinion, since between 4 previous revisions this was the only one claiming about the size of the manuscript. In our opinion, the manuscript needs all the presented discussions, to give to the readers the complete understanding of all the properties and characteristics of the analysed materials. In this sense, we believe that the manuscript has to maintain the present form, without no shortening in size and structure.
