

Editor's Comment:

The author has not made all amendments in line with comments from reviewer 3.

I agree with the reviewer that the manuscript is written inconsistently and chaotically, and the length of the text is not conducive to a good understanding of the subject.

Also, substantive comments were not included, and here should be polemic between author and reviewer.

However, given the response of the author and the other positive decisions/reviews, I think that the article can be published.
