Subject: RE: Request for editorial decision for manuscript number 2014_BJAST_14266

This manuscript needs CAREFUL and THOROUGH check for grammatical, typographical and formatting errors throughout. Examples of above said errors are pointed below; however the entire manuscript needs to be checked for similar errors.

For example, the title format is irregular. It should have either a sentence case like , **“Modulation of immunological and hematological disturbances of diabetes mellitus by diets containing combined leaves of *Vernonia amygdalina* and *Gongronema latifolium*”** or **“Modulation of Immunological and Hematological Disturbances of Diabetes Mellitus by Diets Containing Combined Leaves of *Vernonia amygdalina* and *Gongronema latifolium*”**.

Since “Diabetes mellitus” is abbreviated as “DM” in line 35, the authors should replace “diabetes” and “diabetes mellitus” with DM after line 35 and throughout the manuscript.

Line 7, correct “The study” to “This study”

Line 8, correct “markers”

Line 16, remove italics in “*showed*”

Line 20, expand “WBC”

Line 25, write the conclusion in simple sentences. At present, it is a single, confusing sentence!

Line 31, change “Diet” to “diet”

Line 39, change “Report has it..” to “Reports show that..”

Line 52 to 56, rewrite the sentence for clarity.

Line 65, remove italics in “*Benth*”

Line 88, correct “requirement”

Line 111, correct the spelling for “Streptozotocin” . refer to line 54 and follow a single format.

Line 112. Mention the duration of Streptozotocin treatment. Was this drug given along with diet treatment ?

Line 125, correct “They rats...”

Line 131, 132, expand all the abbreviations when used for the first time in the text.

Line 134 write, 'CD4⁺' refer to line 20. Use the same format throughout the manuscript.

Line 139, mention the name of buffer used.

Line 161, italicize "P" value. Check for the same style throughout the manuscript

Line 171 to 174. Reframe the sentence. The words "Compared to the normal control" is repeating in this sentence.

Line 251. Write the name of the author instead of "and [6]". For example, write, "and XYZ et.al, also reported...."

Line 263. Format the word "cell"

Editor's Details:

Dr. Selvakumar Subbian
